ADVANTAGES:

High Torsion Transformer Bobbin Winding Machine can be equipped with lengthened winding width, the longest wire width can be arranged 1500mm

Winding head adopt guide pin, winding wire will be neat and accurate

Wire wheel adopts ceramic guide wheel, high temperature resistance and non - damage enameled wire.

Front multi - axis synchronous winding, high production efficiency.

With foot switch device, the production is faster and convenient

APPLICATION:

Typical applications for high torsion parallel spindle winding Machine with a single wire size, include the manufacture of gas ignition coils, solenoids, relays, motors and many forms of sensor coil in small and medium batch quantities. It is ideal for use in the production of small inductors, particularly bobbins wound with a single wire size and high turns count. The high maximum winding spindle speed (up to 6000 rpm) enables coils with a high turns count to be wound in a short cycle time.
